

Need a snap lock bag? Make it compostable!

- * BioBag have 100% compostable snap lock bags perfect for snacks & lunches. They meet the Australian Standard AS4736-2006 for compost because they are made from corn starch. This means the whole bag can be placed in a Green Organics bin when you can no longer use them without even removing the zip lock.
- * The bags are 'breathable' so they keep the food inside fresh for longer.
- * These bags are the first of their kind.

Great Fundraising Opportunity

You could use this innovative product to raise money while reinforcing positive learning about recycling.

We can also provide the information and pictures for your newsletter or website advertising.
